

# iButton Bluetooth Download Transfer Station

## *iButton Bluetooth Data Sheet*

**TEK P/N 750230**

The iButton Bluetooth Download Transfer Station (DTS) provides a wireless connection from the TEK Touch Pen to any Bluetooth compatible PDA. Data stored on a Touch Pen can be downloaded wirelessly to a PDA and stored for safe keeping until it can be uploaded to the main database. This allows the Touch Pen to read buttons in multiple locations before needing to return to a central office. Using an iButton DTS, Touch Pen data can also be uploaded directly to a Bluetooth compatible PC. The iButton DTS is self contained and because of its own rechargeable batteries does not need to draw power from the PDA or other external source. It can also be used as a stationary iButton reader with the included AC adaptor. If expected field usage will exceed the rechargeable battery life, the user can install 4-AA Alkaline batteries.

<b><u>Specifications</u></b>	<b><u>iButton Bluetooth Download Transfer Station</u></b>
<b>Size</b>	3.5" X 7.0 inches (includes housing)
<b>Battery</b>	Rechargeable NiMH
<b>Battery Life</b>	8 Hours
<b>DC Input</b>	6V @ 1A max during charging
